

EXPERIMENTAL EVOLUTION: Concepts, Methods, and Applications of Selection Experiments  
Theodore Garland, Jr. and Michael R. Rose, Editors  
University of California Press (Charles R. Crumly)

Part One: Introduction to Experimental Evolution

1. Darwin's other mistake - Rose, Garland
2. The importance of experimental studies in evolutionary biology - Futuyma, Bennett
3. Modeling experimental evolution using individual-based models - Roff, Fairbairn

Part Two: Types of Experimental Evolution

4. Experimental evolution from the bottom up - Dykhuizen, Dean
5. Experimental evolutionary domestication - Simões, Santos, Matos
6. Long-term experimental evolution and adaptive radiation - Travisano
7. The experimental study of reverse evolution - Estes, Teotonio
8. Field experiments, introductions, and experimental evolution: A review and practical guide - Irschick, Reznick

Part Three: Levels of Observation in Experimental Evolution

9. Fitness, demography, and population dynamics in laboratory experiments - Mueller
10. Laboratory selection studies of life-history physiology in insects - Zera, Harshman
11. Behavior and neurobiology - Rhodes, Kawecki
12. Selection experiments and experimental evolution of performance and physiology - Swallow, Hayes, Koteja, Garland
13. Through a glass, clearly: Experimental evolution as a window on genome evolution - Rosenzweig, Sherlock

Part Four: Applications of Experimental Evolution

14. Understanding evolution through the phages - Forde, Jessup
15. Experimental approaches to studying the evolution of morphological allometries: the shape of things to come - Frankino, Shingleton, Emlen
16. Sexual exploration in experimental evolution - Turner, McBride, Zeyl
17. Physiological adaptation in laboratory environments - Gibbs, Gefen
18. Evolution of aging and late life - Rauser, Mueller, Travisano, Rose
19. Theoretical and experimental approaches to the evolution of altruism and the levels of selection - Kerr
20. Laboratory experiments on speciation - Fry

Part Five: Critiques and Caveats

21. A critique of experimental phylogenetics - Oakley
22. Laboratory evolution meets Catch 22: Balancing simplicity and realism - Huey, Rosenzweig
